ALOK SHARMA(2400520100011)

ANUJ AGRAWAL(2400520100019)

GUNJAN KUSHWAHA(2400520100037)

PROJECT OVERVIEW

- Web-based system for managing personal expenses
- Records daily expenses with categories
- Provides monthly expenses summary
- Uses charts for expenses analysis
- Categorize spendings
- Encourage financial discipline
- Provide visual expense analysis

EXISTING PROBLEM

- People often forget daily expenses
- Difficult to analyze monthly spendings
- Overspending due to lack of tracking
- No simple personal budgeting tool

SYSTEM FEATURES

- Add daily expenses with date
- Expense categories(Needs, wants, Savings)
- Expense list and deletion option
- Monthly expense calculation
- Graphical expense distribution
- The 50-30-20 Budget rule
- 50% income- Needs(Rent, Groceries, Utilities)
- 30% income- Wants(Entertainment, Travel, Charity)
- 20% income- Savings

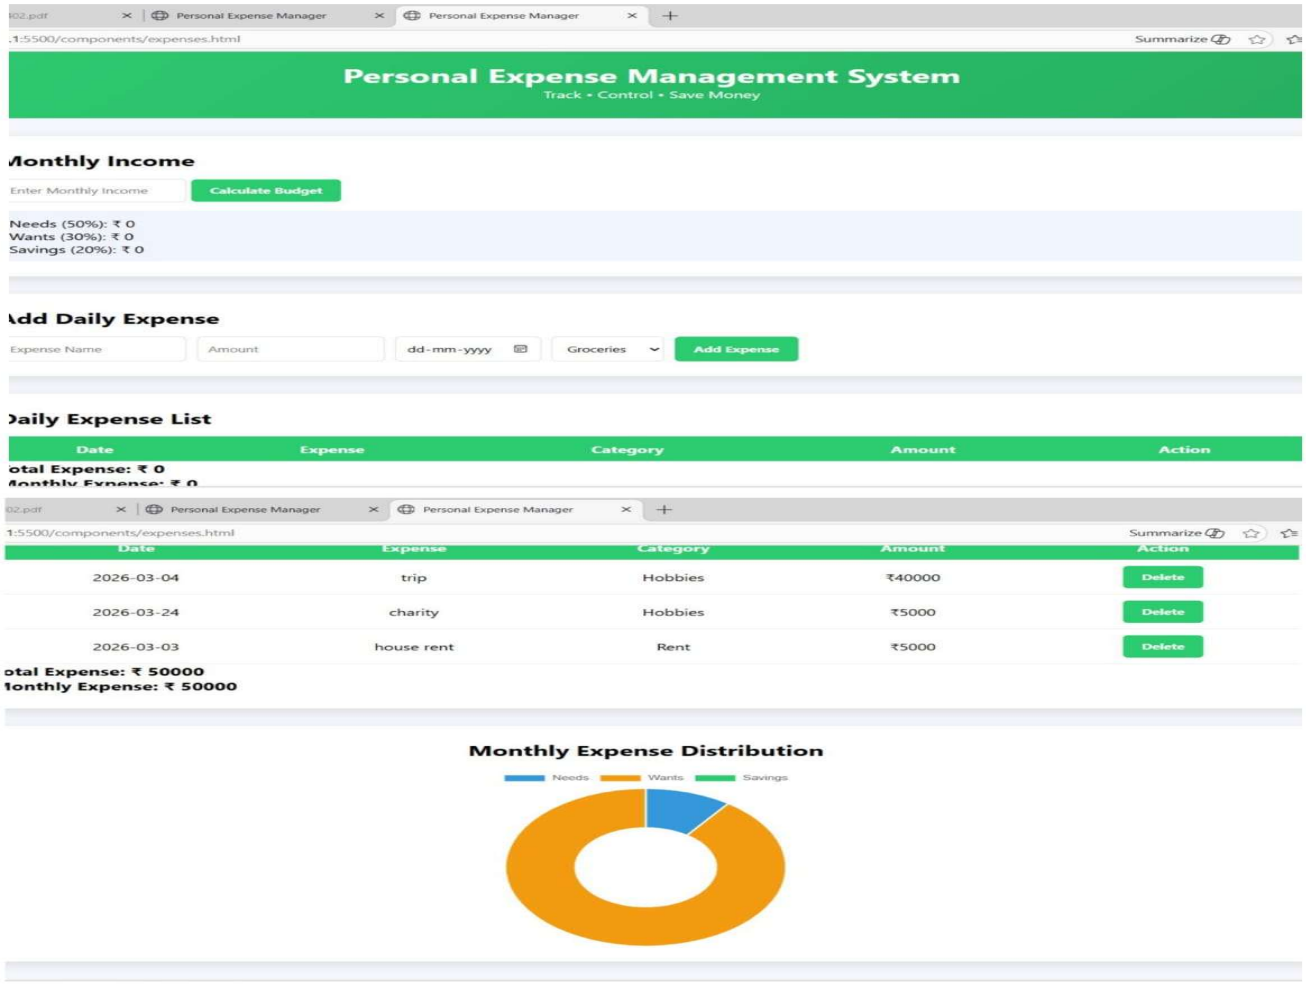
COMPARISON WITH EXISTING SYSTEMS

Feature	Mint	YNAB	Expensify	Our System
Expense Tracking	Yes	Yes	Yes	Yes
Automatic Bank Sync	Yes	Yes	Yes	No
Budget Planning	Yes	Yes	Limited	Yes
Graphical Reports	Yes	Yes	Yes	Yes
Manual Expense Entry	Yes	Yes	Yes	Yes
Cost	Some paid features	Paid	Paid	Free

Project Development Timeline

- Week 1: idea selection
- Week 2: planning
- Week 3: UI design and layout
- Week 4: Implement expense tracking logic
- Week 5: Chart integration and testing
- Week 6: Final testing and presentation

Current Status:



TECHNOLOGIES USED & FUTURE SCOPE

- HTML(structure of the website)
- CSS(styling and layout)
- JS(logic and calculations)
- Chart.js(Expense charts)

- Mobile Application version
- Cloud database integration
- Automatic spendings alert
